

## Geometry

### Unit 3 Review – Intro to Proofs

On problems 1-5 circle the letter next to the best answer. Take your time and check your work.

1. Which statement is the converse of the given statement?

*If points P, Q, and R are collinear, then Q is between P and R.*

- (a) If Q is not between P and R, then points P, Q, and R are not collinear.      (b) If points P, Q, and R are not collinear, then Q is not between P and R.
- (c) If Q is between P and R, then points P, Q, and R are collinear.      (d) If points P, Q, and R are collinear, then Q is between P and R.

2. Which statement is a good definition of a square?

- (a) A square is a shape with four sides.      (b) A square is a shape with four congruent sides.
- (c) A square is a quadrilateral with four congruent sides and four congruent angles.      (d) A square is a parallelogram four congruent angles.

3. Which property justifies this statement: If  $4x = 16$ , then  $x = 4$

- (a) Multiplication Property of Equality      (b) Reflexive Property
- (c) Division Property of Equality      (d) Symmetric Property

4. The Symmetric Property justifies which statement below?

- (a) If  $y - 17 = g$ , then  $y = g + 17$       (b) If  $\angle J \cong \angle R$  and  $\angle R \cong \angle H$ , then  $\angle J \cong \angle H$
- (c) If  $AM = RS$ , then  $RS = AM$       (d) If  $5(3a - 4) = 120$ , then  $15a - 20 = 120$

**Name the property that justifies each statement.**

5.  $m\angle ABC = m\angle DEF$  and  $m\angle DEF = m\angle ABC$       5. \_\_\_\_\_
6.  $AB = CD$ ,  $CD = EF$ . Therefore,  $AB = EF$ .      6. \_\_\_\_\_
7.  $x + 7 = 5$ ;  $x + 7 - 7 = 5 - 7$       7. \_\_\_\_\_
8.  $x = y$ ; If  $x = 18$ , then  $y = 18$ .      8. \_\_\_\_\_
9.  $\angle A \cong \angle A$       9. \_\_\_\_\_
10. If  $x + y = 7$ , then  $4(x + y) = 28$       10. \_\_\_\_\_

**11. Fill in the blanks below to complete the proof.**

**Given:**  $m\angle ABC = 80$

**Prove:**  $x = 8$

a.  $m\angle ABC = 80$

a. Given

b.  $m\angle ABD + m\angle DBC = m\angle ABC$

a. \_\_\_\_\_

c.  $(3x + 3) + (6x + 5) = 80$

b. \_\_\_\_\_

d.  $9x + 8 = 80$

c. \_\_\_\_\_

e.  $9x = 72$

d. \_\_\_\_\_

f.  $x = 8$

e. \_\_\_\_\_

**12. Name the property of equality that justifies each statement.**

**Given:**  $3(x - 3) = x + 7$

**Prove:**  $x = 8$

**Proof:**

<u>Statements</u>	<u>Reasons</u>
a. _____	a. _____
b. _____	b. _____
c. _____	c. _____
d. _____	d. _____
e. _____	e. _____

13.

$$m\overline{PR} = 9n - 5$$

Given:  $m\overline{PQ} = 3n$

$$m\overline{QR} = 25$$

Prove:  $n = 5$

	Statement		Reason
1		1	
2		2	
3		3	
4		4	
5		5	
6		6	
7		7	

14. Given:  $5j + k = m$

$$k = 3j$$

$$m = p$$

Prove:  $p = 8j$

	Statement		Reason
1		1	
2		2	
3		3	
4		4	
5		5	
6		6	
7		7	

## Short Response

**SR #1:** Determine if the following statements are true or false. If false, provide a counterexample.

- a. If a whole number is a multiple of 2, then the whole number is even.
- b. Animals that eat carrots are rabbits.
- c. Two lines that intersect to form four  $90^\circ$  angles are perpendicular.
- d. All plurals end with the letter s.
- e. If a quadrilateral has four congruent angles, then the quadrilateral is a square.
- f. An isosceles triangle is a triangle with at least two congruent angles.

**SR #2:** Use the following statement to answer the following questions: ***Cats are mammals.***

- a. Write a conditional statement.
- b. Is your conditional true or false? If false, give a counter example.
- c. Write a converse statement.
- d. Is your converse true or false? If false, give a counterexample.
